Download and Installation

1. The download file can be found at <http://www.equinehoof.co.uk/score.php>
2. After downloading to your Download folder, copy the Score Installation file to your documents folder.
3. Unzip or open the file.
4. Select 'Score Installation' and right click and select 'Run as administrator'. Depending on your version of windows and anti-virus software, you may be warned that the program is unknown or unsafe to install, the program is save to install and you can install it safely.
5. Follow the installation prompts, mostly by selecting 'Next >'.
6. After installation, Score and Score Help (this file) will be found on the Start Menu.

Install Score by right clicking and selecting 'Run as administrator'

Overview of SCORE

SCORE takes care of most of the organisation and data associated with a farriery competition, with SCORE you can do the following:-

1. Define classes which hold:-
 - a. Score fields
 - b. All the information required to create and print
 - i. Working times schedule.
 - ii. Judges sheet for recording scores.
 - iii. Labels for Specimen shoes.
2. Hold the following competitor information:-
 - a. Competitors names
 - b. Addresses
 - c. Classes they have entered.
 - d. Striker name (optional)
 - e. Team (optional)
3. Work schedules produced as:-
 - a. Printed
 - b. Webpage.
4. Enter scores
 - a. For each competitor.
5. Define reports which display the results:-
 - a. For each class (or part of a class)
 - b. Compile championship results over several classes.
 - c. Results by individual or team.
 - d. Tie-breaks can be set in the event two or more competitors achieving the same total score.
 - e. Reports can be grouped together into a batch of reports allowing them to be printed together.
6. Information can be produced the following ways:-
 - a. Printed
 - b. Labels
 - c. If you have .pdf printer software such as Bullzip (<http://www.bullzip.com/products/pdf/info.php>) which is free download, you can create .pdf files of your printouts, via the print option in score.
 - d. As Webpage for insertion into websites.
7. Information can be removed after competition leaving the class and report structure as before, so that SCORE requires less setting up before the next year's competition.
 - a. Remove all competitors' names, scores and schedule information.
 - b. Remove just the names of competitors who did not compete.
 - c. Remove just the scores and schedule information with the option to renumber the competitors' numbers.

[Index](#)

Setup Wizard for SCORE

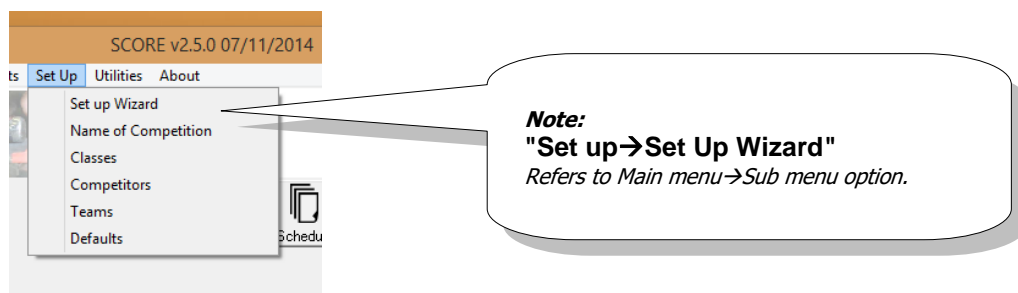

Figure 1 Part of SCORE'S Main Menu

When you first start SCORE you will have to tell the program about the competition.

You can use the **Set up→Set Up Wizard** to automate the following steps.

Step 1 - Competition Name

Select **Set Up → Competition Name**

This is the Name of the whole competition.

Step 2 - Define Classes

When you first start SCORE you will have to tell the program about the competition's structure, before you can enter scores.

Select **Set Up → Classes** from the menu.

A Class will have a title and a number of score fields (Maximum 16) and a Total field. Other information required for the production of a work schedule for the class can optionally be set on the Round Times, Forges & Horses tabs.

Step 3 - Competitors

Select **Set Up → Competitors** from the menu.

This will display the Competitors Grid.

To enter new competitor's names, select [Add] and the Competitor Form will be displayed.

Classes Entered Tab

To create a blank score record for each competitor select the Classes Entered tab and click the box for each class the competitor has entered for. An empty score record will be created (this can be seen in **Active Scores→Active scores for this Class**), allowing scores to be entered in step 5 and the competitors name will be in the Schedule.

Note: If the entered check box is not ticked, the competitors name will NOT be listed in the Active scores and in the Un-allocated list in the Schedule.

Each competitor will be given a number automatically and numbering is starts at 501.

IMPORTANT: It is recommended that 3 figure numbers or more are used for competitor numbers as this will prevent later confusion between a score value (i.e. 6.0, 9.5, 3.0) and a competitor number (i.e. 501, 502, 503), SCORE has a default value of 500 and can be changed from **Set up→Defaults**.

Step 4 - Reports

Select **Reports → Add/Edit Report** from the main menu. Define the type of report you require.
[More information on reports.](#)

Step 5 - End of Setup Wizard

End of wizard.

You will need to select an Active Class
Select **Active Class → Change Active Class** from the main menu.
Select the class you wish to enter scores for.
[More information on Active Class.](#)

Enter scores for Active Class

Select **Active Scores → Active scores for this Class** from the main menu to select the competitor for whom you wish to enter scores for.

Important: If a competitor is not shown in Score Grid Form, change their entered status on the Competitor Form - Classes Entered tab, and click the "Entered" box for the Class you want to enter scores for, this will create a blank score record for the Score Grid Form and a place their name in the "Un-Allocated" list of competitors on the Schedule Form.

Enter the scores to each competitor, making sure you have the correct Active Class. The total of all the scores entered for the Active Class will be shown at the top of the Active Scores Page, this value can be used as a check sum when compared with the written score sheet.

[Index](#)

Speed Buttons

*Speed buttons allow faster access to SCORE'S main functions which can also be found on the **Active Class** menu.*

Change Active Class

Make a different class 'Active'

Work schedule

Edit or print the work schedule for the 'Active Class'

Print labels

Competitors Address or Class information can be printed

Judges Scoring Sheet

A blank scoring sheet can be printed for each round of the 'Active Class', the information is taken from the Work Schedule.

Scores which have been previously entered can be printed into the Judges sheet to check the data is correct.

Enter scores

Displays the scores for the currently 'Active Class'

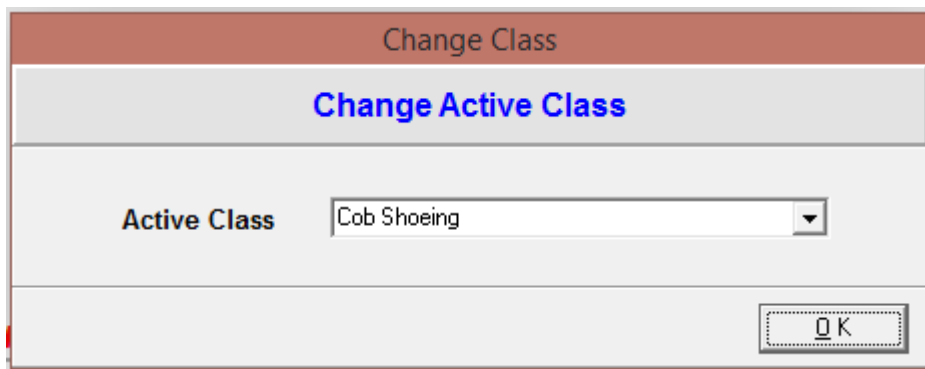

[Index](#)

Active Class

SCORE works on the principal of one set of scores being active at any one time. You will have to change from the presently 'Active Class' to another class to enter scores for a different class. This is to prevent data from one class being accidentally entered into the wrong class, this may seem a restriction but provides a good measure of safety.

All the classes entered from Set Up--> Classes will be shown in the drop down list.

To change the active class select **Active Class→Change Active Class**.

The image shows a software dialog box titled "Change Class". Inside the dialog, there is a section titled "Change Active Class" in blue text. Below this, there is a label "Active Class" followed by a dropdown menu. The dropdown menu currently displays "Cob Shoeing". At the bottom right of the dialog, there is an "OK" button.

Figure 3 Competitors Form

From the Competitors Grid Form you can:-

- Add new competitors.
- Batch edit.
- Change the printer settings.
- Delete Competitors. **Note:** Competitors can only be deleted if they have no scores entered for them or all their scores are set at zero.
- Edit a competitor or batch of competitors.
- Export as a text file.
- Preview the printout on the screen.
- Print the list in the order of the last sort.
- Sort the list of competitors by clicking on the title of the column to sort.

In the Display box, you can extend what is displayed.

Note: Double Click a competitor to edit.

[Index](#)

Competitors Form

To add a Competitor select **Set Up** → **Competitors** to display the Competitors Grid. This displays the list of Competitors.

- Sort by clicking on the headings.
- Click 'Add' to add a new competitor.
- Select by double clicking or select and click the edit button.

The screenshot shows a window titled "4 Competitors" with a tab labeled "Competitors". It contains a table with the following data:

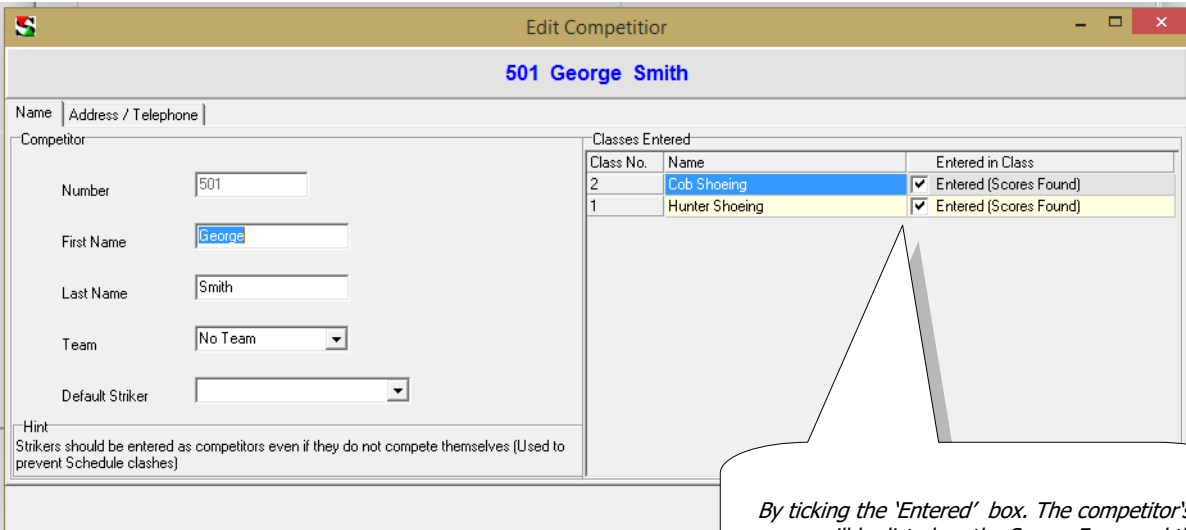

No.	First	Last
501	George	Smith
502	Harry	Worth
503	George	Jones
504	Bryn	Jones

Below the table are several controls:

- Display** section with checkboxes: ☐ Team & Striker, ☐ Address & Telephone, ☐ Classes Entered, ☐ Short Class Names.
- Filter** section with a "Clear" button and an empty text input field.
- A row of buttons: Batch Edit, Export List, PrinterSetup, Print, PrintPreview, Delete, Add, Edit, and Close.

By default just the Name of the competitor is displayed. Selecting any of these Check Boxes allow more information to be displayed.

Add, Edit or Delete competitors.

Competitor Form and Classes Entered

501 George Smith

Name | Address / Telephone

Competitor

Number: 501

First Name: George

Last Name: Smith

Team: No Team

Default Striker:

Hint
Strikers should be entered as competitors even if they do not compete themselves (Used to prevent Schedule clashes)

Class No.	Name	Entered in Class
2	Cob Shoeing	<input checked="" type="checkbox"/> Entered (Scores Found)
1	Hunter Shoeing	<input checked="" type="checkbox"/> Entered (Scores Found)

By ticking the 'Entered' box. The competitor's name will be listed on the Scores Form and the Schedule Form for this class.

Figure 4 Competitor Form - Name tab

You can assign a Team to each competitor if necessary; this will be used to find total scores for all the competitors in each team.

You can also assign a default Striker to each competitor, this is used to avoid conflicts where a striker is placed on the same round in the work schedule as the competitor. The striker's name can be changed for another name in the work schedule if necessary.

When you have entered the information click OK. The form will clear and you will be able to enter another competitor if you wish. Click cancel to close the form.

If you are adding a new name, the next un-allocated number will be used. If you are editing a competitor's details you will be unable to change the number allocated.

The first minimum competitor number is set on the [Defaults Form](#)

Enter the Competitors First and Last Name, once the name is entered it will be checked to make sure that it is unique and not already entered.

Teams

Teams are optional.

New teams can be entered on this form.

Strikers

Strikers must be already listed as a competitor to appear in the striker drop down box. Nominating a default striker for a competitor will avoid strikers being placed on the same round as the person they are helping when the work schedule is created.

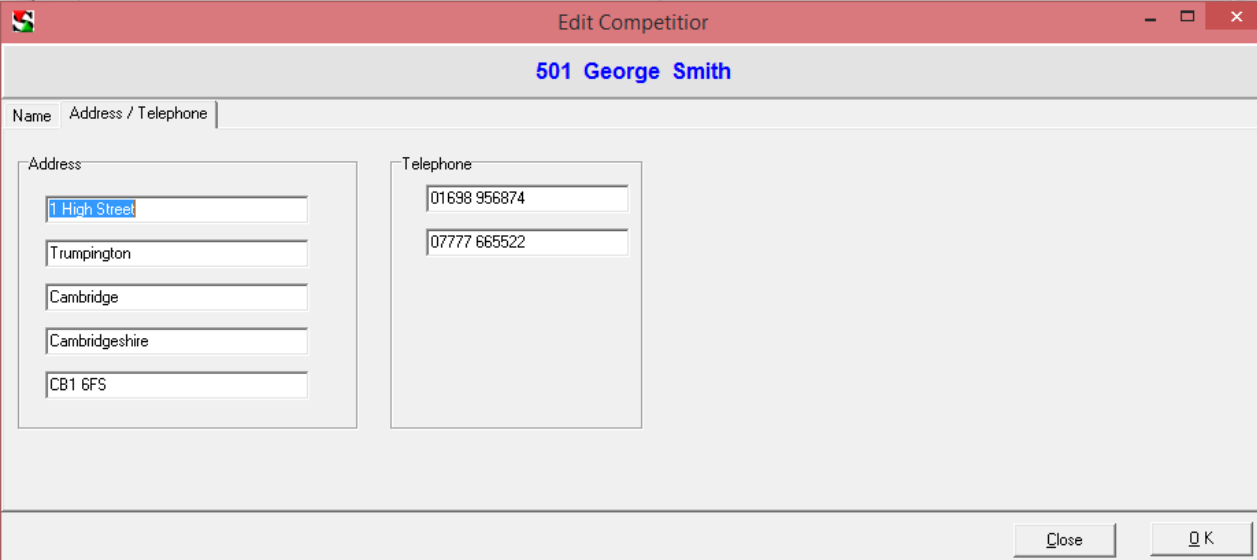

Figure 5 Competitor Form - Classes entered tab

Each class on SCORE is listed to the right, for a competitor to enter a class they must be 'Entered' by clicking the box in the table for the class. An 'Entered' competitor will now be listed on the Schedules Form list and a blank score record is created. (Select **Active Scores**→**Show Active Scores Form**)
See [Active Scores Form](#)

Un-ticking a competitor in the entered column will only remove the competitor's name from the schedule and score record if the scores are set to zero or contain no values. It is by this method that blank score records are removed (deleted) from the active scores grid.

Competitor Form - Address and Telephone

Address labels can be produced from this information. [See Labels](#)

The screenshot shows a software window titled "Edit Competitor" with a red header bar. Below the header, the name "501 George Smith" is displayed in blue. The main area has two tabs: "Name" and "Address / Telephone", with the latter being selected. The "Address" section contains five text boxes: "1 High Street", "Trumpington", "Cambridge", "Cambridgeshire", and "CB1 6FS". The "Telephone" section contains two text boxes: "01698 956874" and "07777 665522". At the bottom right, there are "Close" and "OK" buttons.

Name	Address / Telephone
501 George Smith	
Address	
1 High Street	
Trumpington	
Cambridge	
Cambridgeshire	
CB1 6FS	
Telephone	
01698 956874	
07777 665522	

Figure 6 Competitor Form - Address / Telephone tab

[Index](#)

Classes Form

To add a Class select **Set Up > Classes**.

A table of the classes already on SCORE will be displayed. You can select and edit or delete existing classes.

Classes Form

Set Up→Classes

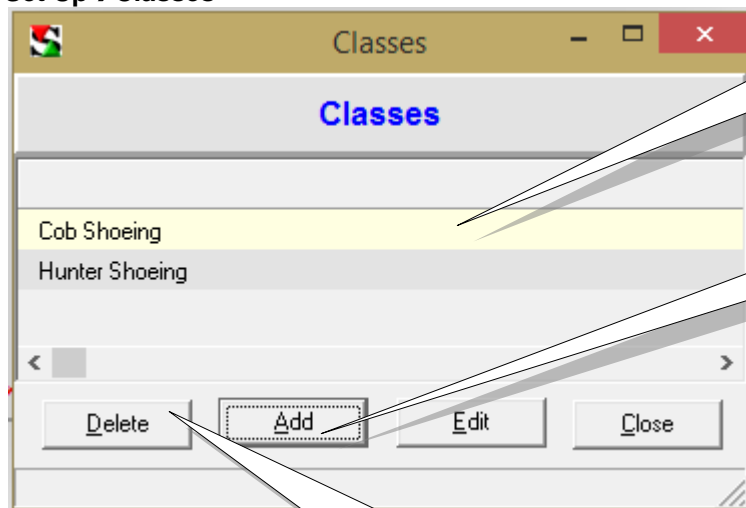

Figure 7 Classes Form

Select a class to edit or delete it.

Select 'Add' to start the new class wizard and add a new class.

Classes can only be deleted when there are NO competitors 'entered' for the class.

This will display the Add New Class Wizard which will ask a few simple questions and then create either a shoeing or shoemaking template class based on your answers. The class you have created can be later edited to suit your needs.

Delete a Class

To delete a class use the following steps:-

1. Make the class to be deleted the Active Class.
2. Zero any scores held by competitors in the class on the Active Scores Form.
See [Edit Scores Form](#)
3. Un-tick the Entered box for each competitor Competitors Form for the class to be deleted.
See [Classes Entered](#)
4. Delete the class on the Classes Form.

Class name and number

Long Class Name:

Short Class Name:

Name of location (i.e. Main Forge):

OK

The long name of the class will be used throughout SCORE

The short name of the class will be used for some titles and headings where space is limited.

Name of Location is used in the Schedule to tell the competitors where the class is taking place

Figure 8 Class Form - Class name tab

Enter the name of the class and location the class is taking place. Location is used in the schedule as some competitions use several locations at the same time.

[Index](#)

Class – Step 2 Score fields tab

Edit Class

Cob Shoeing

Step 1 - Class name | Step 2 - Score fields | Step 3 - (Schedule) Round times | Step 4 - (Schedule) Forges | Step 5 - (Schedule) Horses | Summary

Number of score fields (1-16)

Hint
A typical competition may have 5 fields, Preparation, Shoe, Fitting, Nail/Finish, Specimen.
A total field will be added automatically.

Score field titles

Field 1	Prep
Field 2	Shoe
Field 3	Fit
Field 4	Nail-Finish
Field 5	Specimen

Score fields are used for recording scores for this class, keep the titles short, as long score field names create wide columns in the results reports.
A maximum of 16 score fields can be used.
A total score field is added automatically.

OK

Figure 9 Class Form - Score fields tab

The maximum number of score fields is **16**, this does not include the total field which is automatically added.

Enter the name of each score field i.e. Preparation, Shoe, Fit, Nail/Finish, Specimen etc.

Short field names are recommended as the length of the field title determines the width of the column in printed reports.

You can change the number of score fields later if required (any entered scores may be lost if the number of score fields is reduced).

- Five score fields have been given titles.
- A maximum of 16 score fields are available.
- To change the number of score fields go to the Class Name tab and change the Fields value

[Index](#)

Class – Step 3 Round times tab

7	Horse 7	Forge 1					1
8	Horse 8	Forge 2					2
9	Horse 9	Forge 3					3
10	Horse 10	Forge 4					4
11	Horse 11	Forge 5					5
12	Horse 12	Forge 6					6

OK

Figure 12 Class Form - Horses tab

Edit Horses

Select to set the number of horses to be used in this class (0 for shoemaking classes). When entering this tab you may be warned that the number of horses required is incorrect according to the number of forges and rounds already defined (Select OK to cancel warning). The number of horses required will be displayed above the table.

Forge Title

Select to assign the horse to a particular fire/forge this will be used for the creation of the work schedule.

Horse's Name / Ref. Select the table to name the horse or give it a name or reference number. You must also assign each horse to a particular fire, this will be used in the creation of the work schedule. The part of the table headed LF, RF, LH & RH will be filled automatically with the number of the competitor who is in the work schedule to shoe the horse's foot.

The Feet Sorted check box is unchecked, so feet will be allocated randomly in the work schedule.

Note: When a work schedule has been created the competitor's number will be displayed in the feet assigned boxes.

[Index](#)

Step 5 Summary Tab

The screenshot shows a software window titled 'Edit Class' with a standard Windows-style title bar. Below the title bar, the class name 'Cob Shoeing' is displayed in blue text. A tabbed interface at the top shows five tabs: 'Step 1 - Class name', 'Step 2 - Score fields', 'Step 3 - (Schedule) Round times', 'Step 4 - (Schedule) Forges', 'Step 5 - (Schedule) Horses', and 'Summary'. The 'Summary' tab is currently selected. Inside this tab, there is a section titled 'Schedule Summary' with a sub-section 'Information'. This section contains a list of class parameters and their values:

Competitors Active in Schedule	: 4
Competitor Capacity for class	: 48
Competitors per Forge	: 1
Rounds	: 8
Forges	: 6
Horses	: 12

At the bottom right of the window, there is a button labeled 'OK'.

Figure 13 Class Form - Summary

<u>Summary for the Class Form</u>	
Competitors Active in the Schedule	The number of competitors who have been 'Entered' on the Competitor Form for this class.
Competitor Capacity for the class	Class capacity is calculated by multiplying Forges by Rounds
Competitors per forge	The number of competitors who can compete on a single forge at one time. Multiple competitors are often used in Team competitions.
Rounds	Total number of rounds defined in this class.
Forges	Total number of forges defined in this class.
Horses	Total number of horses defined in this class.

[Index](#)

Competition Schedule Form

Introduction to the Competition Schedule Form

The number of forges, horses and rounds are defined in the [Class Form](#) for each class and are used by the Competition Schedule Form to create the basic structure of the work schedule.

Each competitor has to be 'Entered' into a class on the [Competitors Form](#), this will allow the name for the competitor to be listed in the unallocated list.

By selecting 'auto allocate' each round can be filled or if all rounds are selected the whole work schedule can be filled. On occasions the program can't fill the schedule this can then be completed manually.

Names of competitors can be dragged around the schedule, from the unallocated list onto the schedule, from the schedule to the unallocated list and up and down the schedule. Strikers names can be changed by clicking on the striker cell on the grid, a dialog will appear allowing the selection of a new striker or the entry of a name of a person who is not a competitor but will strike for the competitor.

When a name is dragged from the unallocated list onto the schedule a foot can be assigned by clicking on the foot cell on the grid.

To remove a name from the unallocated list go to the competitors form and un-enter them from the competition.

When the schedule is completed, an empty score sheet can be produced for the judges to enter the scores for the round, this option can be found on the Main Menu > Data > Print score sheet.

Navigate Rounds

Rounds can be selected for display by single round or all rounds. When printing either a single round or all rounds will be printed. Top and Forward steps between rounds.

Round Start/Finish

This information is defined in the Set-up Class form on the Rounds tab.

Available places

Shows

- Places, total capacity for this class as defined in the Class Form.
- Entered, the number of competitors with places allocated on the schedule.
- Free, the number of free or available places remaining on the schedule.

Auto Allocate

Will try to assign a round and foot to each of the competitors in the unallocated list. If all rounds is selected then all rounds will be filled. If the program fails to assign a place to all competitors then this can be done manually.

Un-allocate

Will remove all the competitors from either a round or all rounds and place the names on the unallocated list. A name can be removed from the schedule by dragging it onto the unallocated list.

Sorted

Sorts the unallocated list.

Save as Webpage

The displayed schedule can be saved as a webpage file which can used to create pages on a website or displayed to competitor and the public on screens or projectors during the competition.

This form shows the status of the active report, from this page you can Preview, Print or save the report as HTML.

Change Report allows the selection of another report.

Team Names

Team Names can be added to SCORE in two ways:-

- On the Team Names Form
 - Select **Set Up→Teams** to display the Team Form.
- On the Competitors Form when Adding or Editing a competitor.
 - **Select Set Up→Competitors**

The screenshot shows a window titled "Team Names" with a red header bar. Below the header is a table with the following data:

	Name
1	England
2	No Team
3	Wales

Below the table are four buttons: Delete, Add, Edit, and Close.

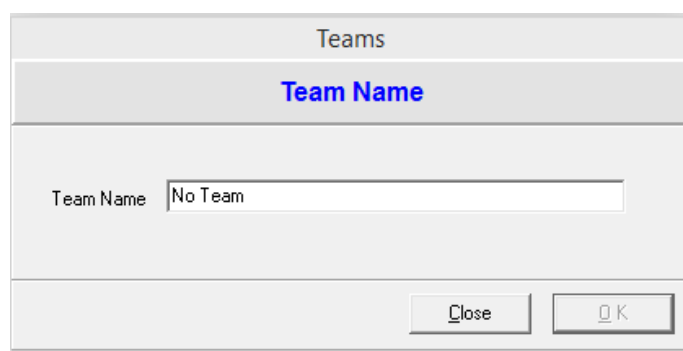

Figure 14 Team Names

Team Names Form Displays a list of the teams presently on SCORE.

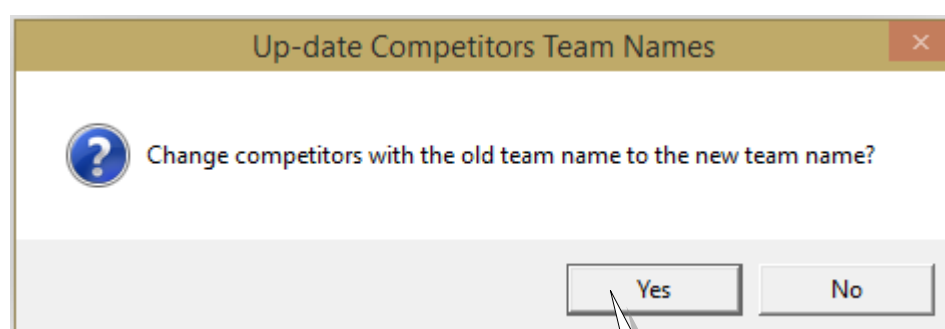

Team names are used to group individuals together. Reports based on the scores of the team members can be defined on the [Reports Form](#).

Updating all references to a teams name

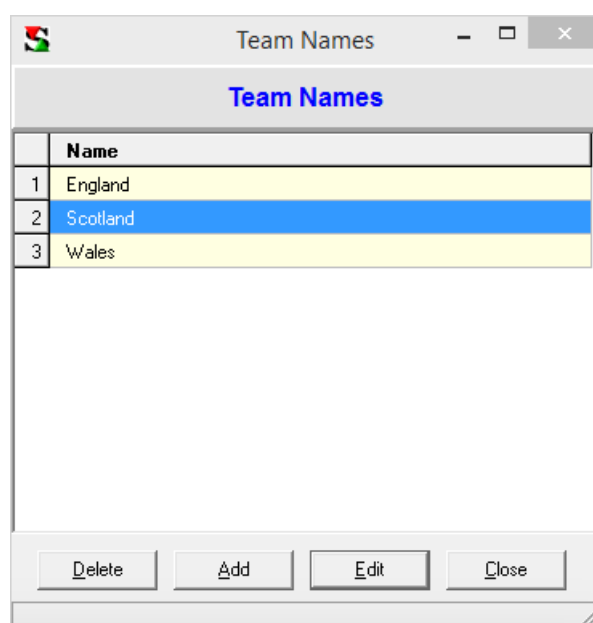

When a team name is changed / edited on the Team Names form you will be asked if you want to update all the references to this name on SCORE, for example all references to the team name 'No Team' can be changed to 'Scotland'.

The screenshot shows a window titled 'Teams'. Inside, there is a section titled 'Team Name' in blue. Below this, there is a text input field labeled 'Team Name' containing the text 'No Team'. At the bottom right of the window, there are two buttons: 'Close' and 'OK'.

The screenshot shows a dialog box titled 'Up-date Competitors Team Names'. It contains a question mark icon and the text 'Change competitors with the old team name to the new team name?'. At the bottom right, there are two buttons: 'Yes' and 'No'. A callout line points from the 'Yes' button to a text box below.

The screenshot shows a window titled 'Team Names'. It contains a table with the following data:

	Name
1	England
2	Scotland
3	Wales

Below the table, there are four buttons: 'Delete', 'Add', 'Edit', and 'Close'. The 'Scotland' row is highlighted in blue.

By editing "No Team" to "Scotland", all competitors with "No Team" will now be in the "Scotland" team when 'Yes' is selected.

Also Team names can be added on the competitor's form, if a new team name is used, the option is given to add the new team name to the team name list.

Edit Competitor

Time Form

The image shows a 'Time' dialog box with a title bar. Inside, there's a section labeled 'Round 1 Start'. Below this, there's a 'Time' label followed by a text box containing '08:00'. Underneath, there are two vertical list boxes: 'Hour' and 'Minute'. The 'Hour' list has values from 00 to 18, and the 'Minute' list has values from 00 to 19. Both lists have a scrollbar. Below the lists, it says '0 Day(s), 8:0'. At the bottom, there is an 'OK' button.

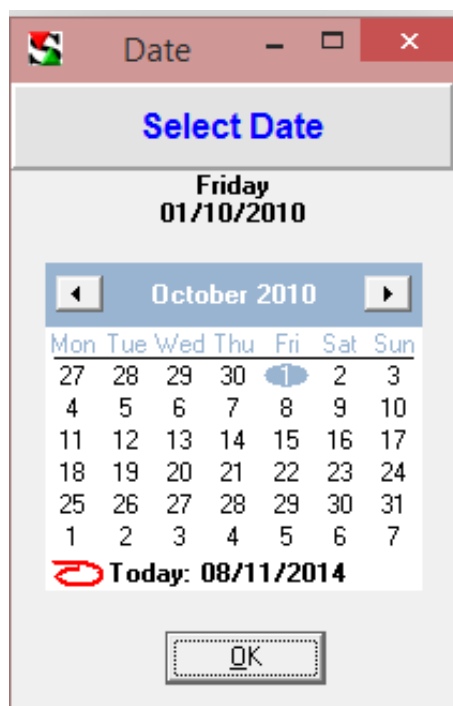

Figure 16 Time Form

This dialog box will be displayed when times on the [Class Form - Rounds times tab](#) are selected by clicking. Use the mouse to select the Hours and Minutes required, then OK to confirm the selected time. This ensures only valid times are entered into SCORE.

[Index](#)

Date Dialog

The date dialog allows the user to select and change the Year Month and Day of the competition.

2	2	502	Worth	Harry	5.0	6.4	6.4	6.5	9.0	33.3
3	2	503	Jones	George	6.5	5.6	6.5	5.6	6.5	30.7
4	2	504	Jones	Bryn	1.0	6.0	5.0	8.0	4.0	24.0

Totals
Grid Total: 113.2
Average: 5.7 Count: 20

Buttons: Change Class, Edit Selected, Batch Enter by Comp No., Close

Figure 17 Active Scores Form

This form displays the score records for the *Active Class* only.

Scores can be entered or edited by:-

- Selecting the row to be edited and then clicking on [Edit Selected] button or [Alt] E
- Double clicking (if a score field is double clicked the edit cursor is placed ready in the selected score field box on the Edit Score Form.
- Select [Batch Enter] to enter a series of scores on the Edit Score Form.

Batch entering multiple competitors

Select [Batch Edit by Comp No.] to enter a series of scores for the active class, each time the form opens, enter the competitors number and any scores already entered will be displayed or a blank record if no scores are recorded. This is the best way to enter multiple scores from the judged score sheet.

This feature is particularly useful when entering the scores for Specimen shoes which are usually judged at the end of the day, after the feet are shod. This allows Specimen scores to be entered quickly and accurately. The edit cursor can be automatically positioned by selecting the radio button next to the score field you want to keep returning to.

Adding a name to the Active Scores Grid

For a name to appear in this form the competitor will have to have been 'Entered' into the active class on the Competitor Form. See [Competitor Form Entered tab](#).

1. Go to the Competitors Form (**Set up > Competitors**)
2. Select the Competitors name to be edited.
3. Select the Entered tab
4. Place a tick in the box for the class you want a Score record and Schedule entry for.

See [Competitor Form Entered tab](#).

Deleting a name from the Active Scores Grid

1. Select the scores for the name you want to delete and set all their scores to zero.
2. Go to the Competitors Form (**Set up > Competitors**)
3. Select the Competitors name to be edited.
4. Select the Entered tab
5. Remove the tick in the box for the class you no longer want a Score record or Schedule.

See [Competitor Form Entered tab](#).

Grid Total

At the top right of the Scores Form is the total of all the scores entered for this Active Class (in this example 113.0).

Grid Total can be useful when you are entering scores from judge's sheets, if you total *each* sheet, you can keep a check that the totals on the judges sheets are the same as the Grid Total.

Score Edit Form

Enter the competitor number to find the score record

Figure 18 Edit Score Form

Zeros the scores on this form for this competitor, this allows the competitor to be un-entered for the active class on the Competitor Form Entered tab.

By entering the Competitors Number, SCORE will find the record which holds the scores for this active class.

Note: If the competitor's number is not recognised, then you probably haven't 'Entered' the competitor in to this class. See [Competitor Form Entered tab](#)

Preselect a score field for quick entry of scores

Figure 19 Part of the Scores Edit Form

The cursor will be positioned at this score field each time the form opens when you are entering scores, useful when using [Batch Edit]

[Index](#)

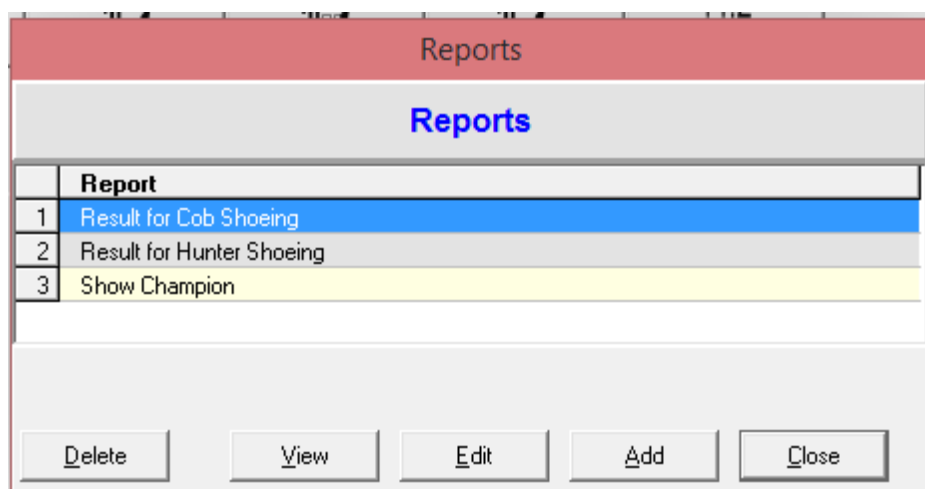

Reports (Results)

Results for a competition are defined by creating a Report in which score fields which may be in several classes are selected for inclusion in a single report.

Reports can be grouped together to create a Batch of Reports which can help to organise the reports into groups.

Report List

On the main menu select: **Reports-->Add/Edit Report**

Report - Step 1

The screenshot shows the "Edit Report" window, Step 1 - Report Name. The title bar says "Edit Report" and the window title is "Result for Cob Shoeing". The steps are: Step 1 - Report Name, Step 2 - Report Fields, Step 3 - Summary.

Fields in the window include:

- Report Title: Result for Cob Shoeing
- Sponsor: A Big Sponsor
- Report Font: Report Font, Arial, 10
- Field Titles: Field Titles, Show Short Class Names, A B C and Legend
- Page Presentation: Portrait, Landscape
- Options: Print Report (checked)
- Webpage Font and Options: Webpage Font, Webpage Font Name (Arial Narrow), Webpage Font Size (20), Colours (Font: Black, Background: Yellow Light), Font Styles (Normal, Bold, Italic)

Buttons at the bottom: View Report, Q K.

Uses the short class name before the field title i.e. **Cob Shoeing - Prep**. This is useful when fields from multiple classes are used in one report.

The report can have A B C type field headings with a legend at the end of the report.

Webpage settings made here used to display the current situation of the results on projectors or large monitors at the competition venue.

Figure 20 Report Form – Report Name tab

Report Title – Printed at the top of the report.

Sponsor – Printed on report can be used for the sponsor's name.

Field Titles box

Allow the selection of how the score field in the report are displayed. Reports can have the following formats-

Field titles at the top of each column

Field Titles

☒ Field Titles

☐ Show Short Class Names

☐ A B C and Legend

Result for Cob Shoeing**A Big Sponsor**

ReScroll Extension to Web Browser

ReScroll

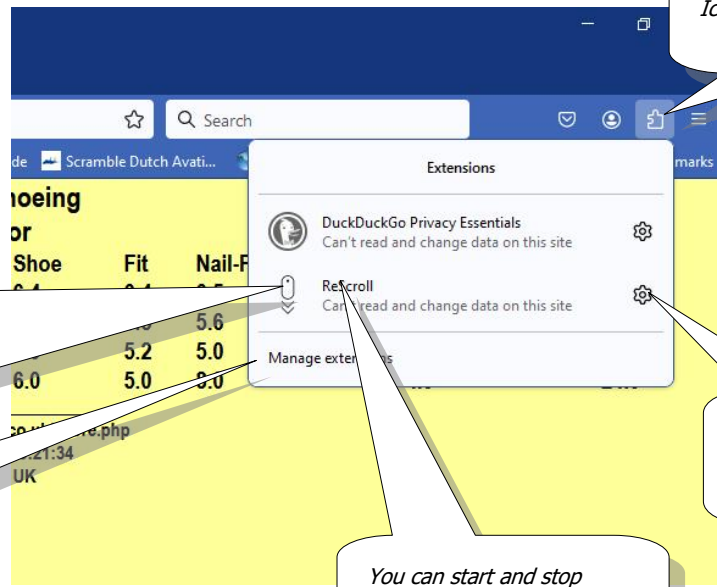

Is a 'Plug in Extension', free to download donationware extension, which can be used on most browsers which will refresh the display automatically. Considering how useful it is a small donation should be made. By saving to the currently displayed file the new version of the file will automatically be displayed.

To install ReScroll extension select Manage Extensions and search for "ReScroll".

ReScroll

These settings will cause a browser with the ReScroll plug-in to refresh the file automatically, long pages will be scrolled upwards until the bottom of the page is displayed, the file page will be reloaded.

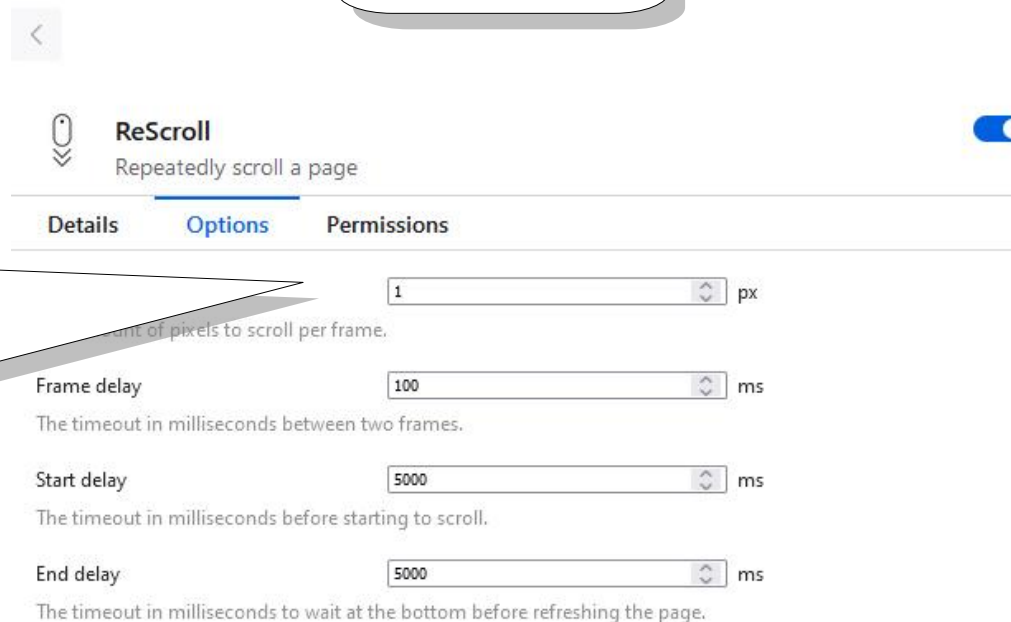

Once setup, each time you save the report to "Projector.HTML" the new file will be displayed on the screen at the next refresh.

Icon for Extensions

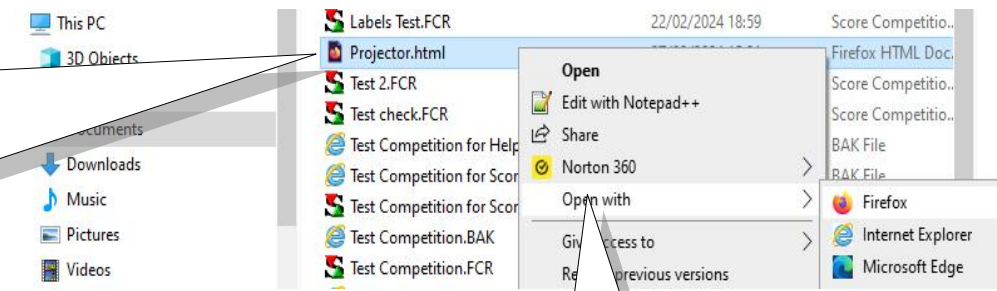

Icon for Settings

You can start and stop ReScroll by alternately selecting it.

ReScroll

Find the Folder to which you saved "Projector.HTML", Right click over the file and select "Open with". Open the browser you want to use and has the ReScroll plug-in installed. The file will be loaded.

Open with Firefox

Batch Reports

Batch reports allow you to group reports together ready to print all at one time.

On the main menu select: **Reports-->Batch Reports**

Batch Reports Grid

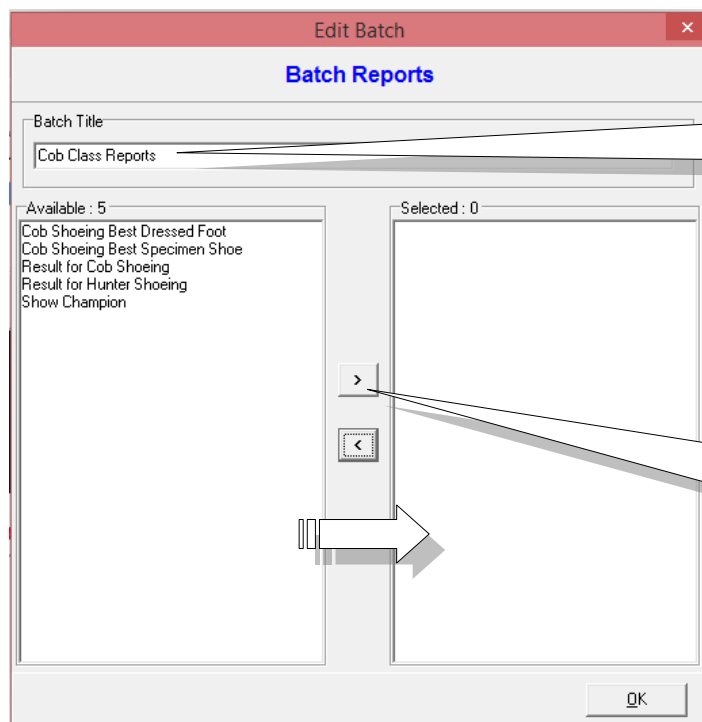

Each Batch has a list of reports which can be modified or printed.

One batch of reports has been created in this example "Results Run".

To create a batch select [Add]

To edit a batch select [Edit]

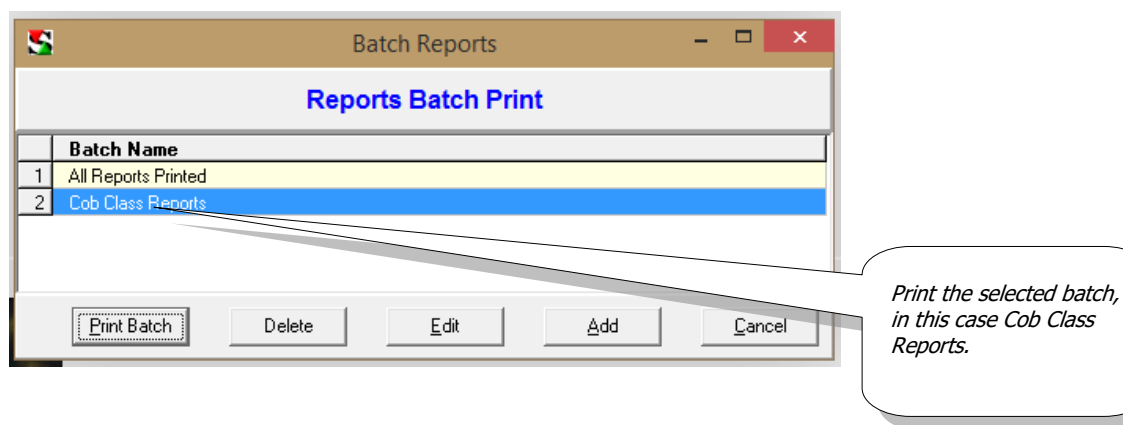

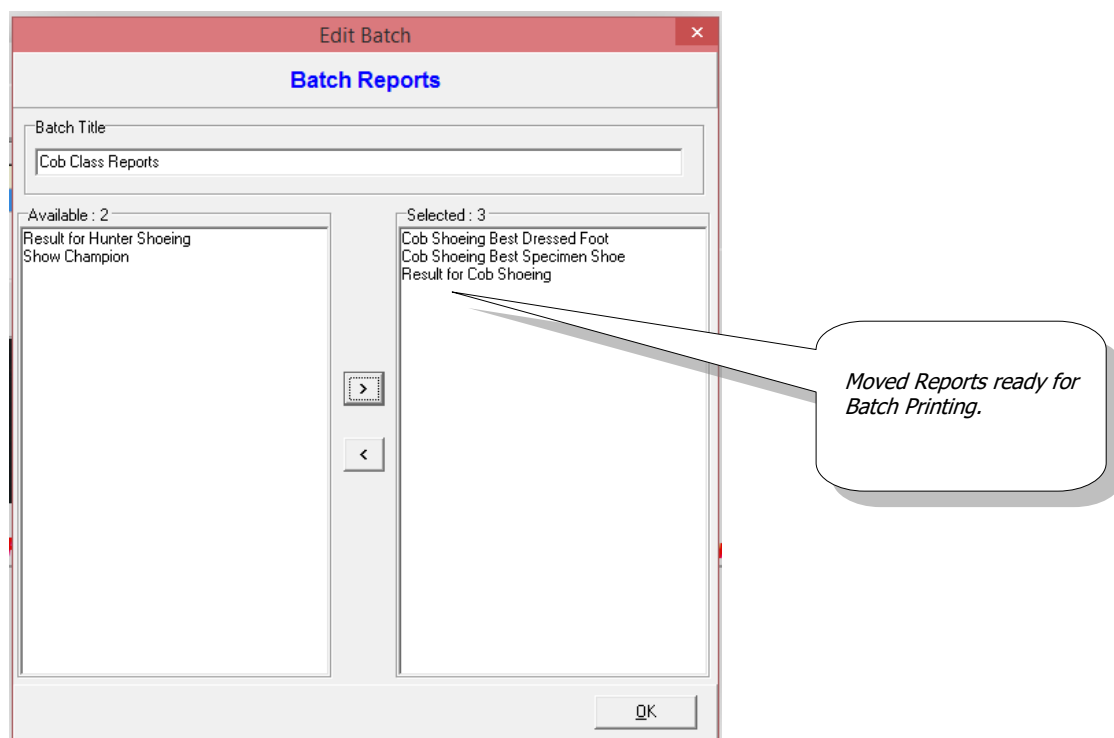

Batch Reports Form

Name or re-name the Batch here.

Move Reports to the Selected window by Drag & Drop or by select and clicking the move button .

Reports are moved from the Available window to the Selected window.

Q K

Figure 23 Labels Form - Type of label tab

Many boxes of labels have the dimensions of the labels printed on the box, enter them into the appropriate places on the form, measurements are in Centimetres or Millimetres and can be converted by the selecting the Millimetres check box (call out 2).

When a print run has been completed the labels used on the sheet will be crossed in red in the Basic layout of labels part of the form, re-load the unused labels to continue using the sheet or reset the value of label start to 1 (call out 1).

A background of green squares can be displayed in preview by ticking the 'Show layout on print preview' (call out 4).

Step 2

When Address is selected there is the option to print address labels for **all** competitors on SCORE.

Judges Sheet

A printed sheet with the names of the competitors and score fields can be produced. The completed sheets are then entered into SCORE. A completed sheet can be re-printed with entered values and totals, to check the data has been entered correctly.

Print Score Sheet

Select round to print: 1

Options:

- ☐ Show Entered Scores
- ☐ Show Team Names

Score Field	Show in Printout
Prep.	Included
Shoe	Included
Fit	Included
Nail-Finish	Included
Specimen	Included
Notes	Included

Print Preview **Print** Cancel

To display the Judges scores already entered, Check "Show Entered Scores". This option is useful to find data entry problems.

What score fields are printed is controlled by including or excluding from this list.

Individual Rounds or All Rounds can be selected

Defaults Form

The image shows a Windows-style dialog box titled "Defaults" with a red close button in the top right corner. The dialog has a blue header bar with the word "Defaults" in white. Below the header, there is a section titled "Competitors" containing a text box labeled "Lowest Competitor Number" with the value "500" entered. Below this text box is the text "(Recommend starting value 500)". Below the "Competitors" section is a section titled "Scores displayed and stored as" containing three radio button options: "000. (Whole numbers)", "000.0 (one decimal place i.e. 6.5)", and "000.00 (two decimal places i.e. 6.55)". The second option, "000.0", is selected. Below these options is the text "(Changing precision can result in data loss)". At the bottom of the dialog are two buttons: "Cancel" and "OK".

Figure 27 Defaults Form

Changes made to the Defaults Form affect all the data in SCORE

It is recommended that competitor numbers start at 500 (or any reasonably higher figure i.e. 1000, 10000) this is to prevent accidentally entering a score value instead of a competitor number. If you have competitor numbers starting at 1, you could easily enter a value of 5 on the Score Form.

Figure 28 Default settings help prevent data entry errors

Scores displayed and stores as...

Formats the way SCORE displays/prints and stores scores.

Utilities: Swap Score Fields

If the user wishes to change the order of the score fields they can be moved by dragging the title of the score field to the required position. In the example below Prep. is moved to a new position after shoe. When a score field is moved in the way SCORE will make changes to the Score Input Form and to any reports which may refer to the changed score field position.

Utilities: Clear data from SCORE

After a competition has finished, in preparation for the next time the competition is held, the main structure of the competition can be retained (i.e. Classes, Schedules and Reports) but the data can be removed (Competitors, Scores and Schedule entries). Alternatively competitors can be retained for the next competition their competitor number can be randomly changed. It is vital that a backup of the competition is made before this utility is used and the new competition structure is Saved As.. with a new file name.

The screenshot shows a window titled 'Clear Data' with a red header bar. Below the title bar, the text 'Clear data from SCORE' is displayed in blue. A red warning message states: 'Backup data before using - Save afterwards with a different file name'. The window is divided into four main sections:

- Competitors:** Contains two checkboxes. The first, 'Delete all Competitors, Scores and Schedule data', is checked and has the subtext '(Retain competition classes and reports)'. The second, 'Delete those who are not active in this competition', is unchecked and has the subtext '(Are not competing or striking in competition)'.
- Schedule and Scores:** Contains two checkboxes. The first, 'Delete All Scores and Schedule entries', is checked. The second, 'Randomly renumber competitors from 500', is unchecked and has the subtext '(Renumbering only possible when there are no scores)'.
- Status:** This section is split into two. The top part, under the heading '4 of 4 competitors to be deleted', lists: 501 George Smith, 502 Harry Worth, 503 George Jones, and 504 Bryn Jones. The bottom part, under the heading '16 Schedule and Score entries to be removed', is currently empty.

At the bottom center of the window is a button labeled 'Activate selected options and Save'. At the bottom right is a button labeled 'Close'.
